25X1A9A

MEMORANDUM FOR:

1. The DCI called just before OOB to state that Secretary McNamara has asked CIA to supply him two papers by close of business today:

a. An examination of the thermal power generating system in North Vietnam, and

b. An examination of the POL system in North Vietnam.

2. The Secretary wants the whole picture on both these targets; i.e., how much of each has been taken out, how long will it take the enemy to get those portions damaged/destroyed back into operation, etc. These examinations are to be as complete and as thorough as possible. They may be in the form of working drafts, since DIA will take a look at what we produce. As soon as they are finished, they can be bundled up and shipped over to SECDEF.
